Projects

Text Cleaner Website

– This is a simple text editing utility, that is completely based on React and Bootstrap. The website has got some features and also supports dark mode. Text cleaner is a responsive website and supports all kinds of devices and operating systems and the alerts and functionality used in the app are compatible with all the devices as well.

Covid prediction model

- A machine learning model using linear regression to find if a particular person with some given symptoms is Covid-19 positive or not.

- Limitations: The model works well but the only limitation is the lack of accuracy in the data feeded to the model.

VISHAL BHOSLE

STUDENT (PREFINAL YEAR CSE)

About Me

I AM A COMPUTER SCIENCE STUDENT WITH HIGH ENTHUSIASM IN DECEN-TRALIZATION AND ARTIFICIAL INTELLI-GENCE.
